

Ather Litepaper

Version 0.1

Introduction

Ather project has some great Features secure, useful, & easy-to-use Product based on Tron blockchain, it will include easy cryptocurrency payments integration, and even a digital arbitration system .

The issues of slow block confirmations and high gas fees need to be solved before we target mass adoption by mainstream users.

And most importantly, it needs awesome user experience We aim to change that by simplifying the interaction between users and the decentralized world.

We want to make interacting with the decentralized ecosystem so easy that anyone can do so without worrying about the complexity of the system.

WHY TRON?

TRON is an ambitious project dedicated to the establishment of a truly decentralized Internet and its infrastructure.

The TRON Protocol, one of the largest blockchain-based operating systems in the world, offers base public blockchain support of high throughput, high scalability, and high availability for all decentralized applications in the TRON ecosystem.

OUR AIM

our team is up to build a secure, useful, & easy to - use product based on private blockchain.

It will include easy cryptocurrency payments integration, and even a digital arbitration system.

At the end, our aims to integrate all companies, employees, and business assets into a unified blockchain ecosystem, which will make business truly efficient, transparent, and reliable.

Each blockchain platform has its own native token.

Such tokens serve as units of payment for the transaction fee incurred on the respective blockchain. Besides, they may also be designated as rewards for network participants who contribute to upholding the integrity, security and availability of the blockchains.

ABOUT Ather

Token Name: Ather

- **Token Ticker: ATR**
- **Token Platform: Tron Blockcain**
- **Token Standard: Trc20**
- **Max. Supply (Hard Cap): 269.000.000**
