Ather Whitepaper

Version 1.0.0
December 2020

In this paper, we present Ather Token, a decentralized
digital asset. which is built into the tron network.
This is not our project but we project.

Introduction

Ather project has some great Features secure, useful, & easy-to-use Product based on Tron blockchain, it will include easy cryptocurrency payments integration, and even a digital arbitration system .

The issues of slow block confirmations and high gas fees need to be solved before we target mass adoption by mainstream users.

And most importantly, it needs awesome user experience We aim to change that by simplifying the interaction between users and the decentralized world.

We want to make interacting with the decentralized ecosystem so easy that anyone can do so without worrying about the complexity of the system.

WHY TRON?

Fast
Transfer ATHER tokens with a throughput of thousands of transactions per second.

Cheap
Tron operates on the Bandwidth model. This is how transactions on Tron can be much cheaper

Secure
TRON-level security supported by a decentralized watcher network and smart contract adjudicators.

Open
Build apps, dApps, developer tools and more on an open and permissionless network.

Trustless
Your assets remain secure on the Tron Network and are fully recoverable at any time.
